

Subject: Data Quality Review - Findings and Next Steps

Dear Manager,

I hope this email finds you well. As part of the data analysis exercise, I have reviewed the provided data and identified a potential data quality issue. Upon exploring the dataset, I noticed that there are some missing values in the 'pointsEarned' field in the 'receipts' dataset. This might impact the accuracy of our analysis, and we need to address this before proceeding further.

Additionally, I found that the 'active' field in the 'users' dataset contains inconsistent formats, which could lead to discrepancies in the results. We should standardize the format to ensure consistency in our data.

To resolve these issues, I will be working on cleaning and preprocessing the data to ensure it is accurate and reliable for our analysis. If you have any specific requirements or insights, you would like me to focus on, please let me know, and I will incorporate them into my analysis.

I will keep you updated on the progress and any further findings. If you have any questions or concerns, feel free to reach out to me at any time.

Best regards,

Yashswin Kapil.
